

# **3<sup>rd</sup> INTERNATIONAL CONGRESS OF CLINICAL POSTUROLOGY®**

## **INTERNATIONAL ORGANISATIONAL CONFERENCE ON THE TREATMENT OF POSTURAL DYSFUNCTIONS**

**Presidents:** R. SAGGINI - C. VILLANI

## **International Organisational Conference on the Treatment of Postural Dysfunctions**

Dear Colleagues,

The 3rd International Congress of Clinical Posturology which took place in Rome in March 2019 aimed at creating a diagnostic, therapeutic and preventive algorithm: eminent lecturers brought their scientific contributions, in representation of the most important national and international schools which have been dealing with postural dysfunctions – proposing interesting therapy solutions – over the last 20 years.

The International Organisational Conference for the Treatment of Postural Dysfunctions aims at developing and realizing a complete pathway of diagnosis, prevention and, obviously, therapy, debating about postural dysfunction and its multidisciplinary treatment in the three ages of life. The realization and redaction of an International Consensus document which provides better and operative safeguards will be the key point of the 3rd International Congress of Clinical Posturology.

The first two congressional days will analyze postural dysfunctions in the three ages of life through “mini battles” (short debates between the main experts of the various disciplines, who will compare their points of view and their approaches) and scientific contributions of many experts and eminent researchers.

The mission is to create an organic thought which could allow – through personalized treatments – the completion of the optimization of recovery potentials, which are intrinsic in afflicted individuals.

The 3rd day will focus – through the International Conference – on the presentation of the document realized during the International Consensus – previously carried out. The numerous researchers coming from European and extra-European Countries who participated in the Consensus will present their own original contributions concerning the treatment of postural dysfunctions.

We hope to meet you all in the Congress.

**Raoul Saggini – Ciro Villani**
